'All human beings are born entrepreneurs. Some get a chance to unleash that capacity. Some never got the chance, never knew that he or she has that capacity'
Nobel Peace Laureate Professor Yunus

Nak, as the oldest of 5 siblings, in a poverty stricken family was forced to leave school to scavenge to help support his family but USD 2/day was never going to be enough and the work was long and dangerous. Nak joined our Social Business Chicken Farm and his enthusiasm to learn ensured he quickly moved from trainee to management as deputy to the professional manager and overseeing the flock database.

Our goal is to use microfinance and social business to build a socially and economically inclusive 'World of Three Zeroes' where all humans lead dignified, meaningful lives

We are scaling our Farm by establishing a Village Grower Project that will provide at least 2,000 of Cambodia's poorest people with the training, mentoring and microfinance they need to unleash their capacity by 2020, and many thousands over the longer term.

BUT

We need THE PERFECT BLOCK OF LAND to establish the 'layer farm' to ensure the farmers can access disease free, vaccinated chicks.

Our Deputy Group CEO and CEO Australia Kat Dunn tells Nak's inspiration story at this [LINK](#)

Help us secure our land so over 2,000 entrepreneurs like Nak can fulfill their potential by 2020, and many thousands more over the long-term
